360SMARTCONNECT

Trans-en-Provence (83720), France

listing.download.description

Characteristics, documents, actions carried out, instructions... Follow real-time object information and simply collaborate with all stakeholders. From their manufacture for the construction site to their maintenance over time!

50% input time saved per field operator
5h of possible savings on time tracking

Simply dematerialize, store and view the information of your objects
Goodbye papers! With 360 SmartConnect, digitize every piece of information and documents about your objects. And make them accessible simply in a few clicks, from the object thanks to a QR Code / NFC or remotely from your computer.

Share and collaborate effectively in your construction projects...
From the design of the part in the factory, to its installation and its proper routing on the site, follow in real time each action carried out by the parties of your project. All in a secure environment where information is frozen!

... and on the maintenance of your objects once installed!
What actions have already been taken? By who? What are the future actions to be planned? Always keep an eye on the maintenance of your items once installed. And keep control over the right realization!

Control and monitor in a few clicks remotely
Thanks to our platform, centralize all the objects tracked by the 360 SmartConnect solution and follow each step of your project! Thanks to exports and visual dashboards, you always know where you stand!

listing.download.benifits

The 360SmartConnect service is based on three fundamental principles:

-Identification: To differentiate objects

-Historization :P keep track of actions related to the object

-Life cycle management :P process engine to drive the product

For uses:
-Traceability and BIM
-For cleaning and maintenance
-For the traceability of plans
-For the signature of the construction sites and memory of the walls
