

AGDATAHUB

Paris (75008), France

listing.download.description

Created to meet the needs of farmers and fili-ministers, Agdatahub is dedicated to all stakeholders in the sector and private and public bodies around a common ambition: to provide European agriculture with a mutual and sovereign technological infrastructure to ensure the development of agricultural digital in France and Europe.

It operates the agricultural data exchange platform API-Agro and the SED platform for cattle and small ruminant farmers. On the consent side, Agdatahub offers several modules: an identit; digital number using the Blockchain (co-deacute;development with Orange), a consent router and a dedicated portal for agricultural producers.

In support of these solutions, Agdatahub provides operational consulting assignments related to data (project management, technologies, marketing) to support agricultural filigraved players in the uses of digital.
