Arjo Solutions

Le Bourget-du-Lac (73370), France

listing.download.description

Edgyn (formerly Arjo Solutions) is an innovative French company leading the fight against counterfeiting, illicit trade, and parallel markets. With over 20 years of experience, Edgyn designs and deploys physical and digital solutions for authentication, traceability, and brand protection, enabling governments and large international brands to secure their products, protect their revenues, and strengthen consumer trust.
Our mission: to safeguard legitimate trade by making the market safer, more transparent, and compliant with new regulations.

listing.download.benifits

Edgyn offers a comprehensive suite of solutions combining physical and digital technologies to tackle the complex challenges of counterfeiting, illicit trade, and regulatory compliance. Our approach integrates authentication, serialization, traceability, and connected digital tools, enabling governments and brands to secure their products while improving transparency, compliance, and consumer engagement.

Serialization & Traceability:
• Serial number generation informed by our expertise in regulated markets and powered by seamless integration with packaging supplier
• High-speed serialization solutions servicing the most demanding industrial lines
• Multi-level Track & Trace platforms to track each product from the factory floor to the shelf to the consumer
• Native integration of GS1 Digital Link/QR Code standards for global interoperability

Connected Products & Regulatory Compliance:
• Resolver: centralized, intelligent QR code management that delivers relevant and dynamic consumer experiences
• Multi-Regulation Tool: quick and easy compliance with different international regulations (EU, US, Asia, LATAM, etc.).
• Digital Product Passport (DPP): QR code-accessible digital product identity, enabled through ready-to-use solutions

Authentication & Product Protection:
• Digital Fingerprint: unique digital fingerprint technology that is impossible to reproduce
• Pattern recognition: authentication using randomly generated complex patterns
• Invisible inks & taggants: discreet and tamper-proof physical solutions
• Secure markings: holograms

Our Strengths:
• A heritage in security: technologies derived from the world of banknotes and official documents
• Expansive industry expertise: luxury goods, beauty, pharmaceuticals, wines & spirits, consumer goods, and more
• A developer-integrator model: a unique combination of in-house R&D and international partnerships
• Added value:
- Industrial optimization
- Protection and regulatory compliance
- Consumer engagement
