

Automatic qualitying of product data

Paris (75009), France

listing.download.description

YZR is a SaaS tool that allows you to:

- Automatically standardize with artificial intelligence the data received by your partners, suppliers and internal data for the entire chain in a homogeneous and standard way
- Create a complete and accurate view of the intelligence of product attributes; start from descriptions to better qualify and categorize your products or merchandise for finer analyses of your sales / stocks
- Collaborate with your internal teams and suppliers / partners / customers by sharing the automatic qualitying of your data
