Barcode scanning by camera!

Labège (31670), France

listing.download.description

Viziotix provides an expert barcode scanner software library for enterprise applications. The library can be integrated into applications and solutions that run on any camera-equipped smart device. This professional software allows fast and accurate scanning of barcodes to ensure the highest efficiency of any barcode process. The software is able to scan many codes per image and also decode barcodes that are difficult to read. Typical applications include inventory counting, planogram compliance, self-service scanning, and mobile payment. Typical devices include smartphones and robotic or automated scanning solutions.
