Challenge your CSR policy

Guérande (44350), France

listing.download.description

Too much PPE is used on a daily basis, while it does not comply with regulatory requirements, the recommendations of use of manufacturers. Keep Control provides a global response to work safely from the identification of equipment, the exchange of useful information, the monitoring of their compliance to recycling.
Management becomes simple, even when devices are used while roaming.
Objective: to consume less PPE and better use it for increased safety of wearers.

listing.download.benifits

We support our customers in the design of markings specific to PPE & materials subject to regulatory control.
We produce the markings with the GS1 GIAI identification of our customers for the traceability of existing equipment fleets.
Our software solution developed specifically for the complex management of equipment simplifies the monitoring of the life cycle of each equipment, access to static and dynamic information for use in accordance with legislation, manufacturer recommendations and best practices defined by the customer.
No need to regularly order PPE, without first checking:
- the availability of your new and used stocks
- the individual needs related to the conformity of the PPE of each endowment

Company's information
