listing.download.description

VEGA INFORMATIC is a company specializing in the development of stock management and cashing solutions, to the professionals of the equipment of the person (pre-eirc;e--wear, man, woman, child, lingerie, shoes, leather goods, sporting goods) and the equipment of the house (decoration, linen).

Our experience in managing these particular sectors for almost 30 years has provided us with in-depth expertise in the "third" feedback of our clients. We have always followed their trends of thinking and working methods by getting them into new technologies.

Our software solutions optimize all the steps of point-of-sale management:

- the point-of-sale/supplier interface: orders, receptions, returns
- the point-of-sale/inter-cash interface: transfers
- the overall management of the activity: pricing, purchasing plan, cross-analysis and comparative
- customer relationship: cashing in, sales relocation, loyalty programs;
- the connection in real time with a merchant website

Our specialized teams have developed Polaris from A-Agrave; Z by combining a triple expertise: technological, global and functional.

More than 1,800 companies trust us, more than 5,000 outlets with our solutions.
