Our Global Outsourcing Service from EDICOM allows you to completely manage your B2B communications platform and all related tasks; its day-to-day monitoring as well as the management of technological resources (servers, databases, copies of security, registration of interlocutors , contr-ocirc; errors, etc.).

EDICOM provides your disposal with a maximum security infrastructure, which is monitored at all times (24 hours a day, 7 days a week). It is managed by professionals who will devote themselves exclusively to making your solution available in a constant way.

An EDICOM technician will act as an advanced user of your communications platform in conjunction with all the benefits of your B2B e-commerce solution.

Business-to-business communications projects focus on technological aspects such as document formats, communications protocols, etc. by putting in the background the challenges of moves, rapid integration or the connection between different partners.

Our "Onboarding interlocutors" service sets up management projects for the integration of your business partners. This service involves adopting an asset in the face of initiatives made possible by the fact that they can quickly connect to your communications platform, from where to an increase in the volume of electronic documents - eacute;

Advanced management services offered by EDICOM and finished for Outsourcing and Onboarding allow to outsource the necessary operational opportunities to manage the customer's solution but also the integration of new partners - agrave your e-commerce platform.

Through the IPM (Integral Partner Management) management service, EDICOM assumes all its own activities; an "EDI Administrator Group", which allows the outsourcing of tasks involved in the ongoing management of your community of interlocutors.

EDICOM is a signatory to the Interop-ability Charter of Electronic Billing Solutions: click here for more information.
