Food Confidence Platform

Orgeval (78630), France

listing.download.description

Connecting is a SaaS solution that allows food and beverage companies to manage, control and visualize in real time all their data throughout their supply chains, from farm to fork:
- traceability
- quality control
- durability
- crisis management
- risk reduction

We want to demonstrate their commitments to their customers and consumers and collect their opinions.

listing.download.benifits

• Management and control of your data
• Better visibility of your supply chains
• True traceability and end-to-end supply chain management
• Highlighting differentiation
• Risk reduction and quality control
• Guaranteed brand image
• Management and enhancement of their commitments

A product-centric approach, adapted to the complexity of the food industry:
- Digital Twins: an unlimited amount of data collected in batch throughout the product journey, aggregated, updated and searchable in real time
- LiveAudit: digital audits and real-time alerts, ensuring data and product compliance
- Blockchain: each actor owns its data, confidentiality is guaranteed and access to data configurable
