Inventory Management (WMS) and Management

Montauban (82000), France

listing.download.description

Itiz is the publisher of an business management solution (WMS) that integrates several GS1 standards. For example, we are able to interpret GS1 barcodes (1D or 2D) in order to search the item (and its packaging), the batch, the date of péremption, … We also have the functions of génération of ération of éts for packages that do not have a barcode.
We can also manage EDI flows such as EPCIS, for example, which we use in the pharmaceutical sector.
Our solutions adapt both to small companies (with 1 person in some cases) but also to large companies (companies of about 100 people) and very varied sectors: industry, e-commerce, retail, négoce, …
We also say a pharma solution to manage the commission of the media.
Finally, we are very much developing specific applications in order to meet specific identification, work or other needs.
Don't à contact us to learn more about our solutions.

listing.download.benifits
