MULTITEL ASBL

Mons (7000), Belgium

listing.download.description

From the analysis of needs and the implementation of specifications to prototyping, on-site testing and technology transfer, MULTITEL responds to the most specific projects that require the development of tailor-made solutions in the following area:

Identification, positioning and monitoring of objects and people in indoor and outdoor environments with the development and implementation of the system of tra-ccedil; ability of real time.

Proposed solution: system of teacute and data to repatriate information from sensors distributed by wireless communication systems (positioning sensors, temperature,raking, humidity, etc.)

Int-e-ers and more value:

System easily and quickly can be implemented, based on the "Zigbee" standard and RFID technologies;
Skills in the development of on-board systems (PDA) and opportunities to integrate other modalities (voice commands, image processing to control access and automatic counting);
Electronic skills (R and D, component development, chamber tests);
Opportunity to interface with other electronic systems (UART, I2C, SPI, etc.);
Frequent bands used: ISM (Industrial, Scientific and Medical) (Guaranteed Cohabitation with GSM Bands);
Computer skills (safety, specifications, project monitoring).
