

# PACKTIC: digital packaging platform

Grenoble (38000), France

## listing.download.description

A true "digital hub for packaging-free", Packtic is revolutionizing the bulk and reuse market thanks to a unique product traceability and consumer engagement platform. Packtic allows you to:

- centralize and secure the dissemination of product data to meet legal traceability obligations and consumer reinsurance needs
- Enhance user data to enable brands and retailers to engage consumers in these modes of purchase, thanks to the consumer application "My Shelf"

### MANUFACTURERS & BRANDS

More than just dematerialization, our digital packaging is a new quality and marketing tool that makes it possible to control the information of bulk products and their dissemination to consumers.

- Creation and customization of digital packaging (logo, showcase page, labels, commitments, recipes ...)
- Access to usage statistics to drive marketing performance
- Open API for integration with GS1 augmented QR codes

### STORES & SIGNS

Thanks to our digital traceability book and its shelf management features, stores gain in security on regulatory obligations and efficiency on shelf performance.

- Access to the Packtic product database filled in and updated directly by the manufacturers (mandatory information, origins, nutritional values, conditions of use).
- Digitization of traceability via Packtic QR codes of devices. All records and labels are recorded in a digital traceability book in accordance with the regulations, which can be extracted at any time and in case of control.
- Dissemination of complete information to consumers: by scanning QR codes and thanks to the "My shelf" application, they keep them at home, without additional labeling.
- Management of the bulk department: input assisted by visual recognition, cleaning plan, alerts, dashboard to improve profitability.
