ZEST HACCP

Nîmes (30000), France

listing.download.description

zest HACCP is a software for digitalization of food process. The web application facilitates the handling of regulatory obligations for food professionals.
This bespoke economic solution adapts to the size of your stores and the specificities of different shelves, but also to the food aisles.

This digital solution allows:

Simplify HACCP steps
To make the mandatory registrations of the Health Mastery Plan
Keep a perfect foodability
Pilot and master all dates (DLC/DLUO)
