

UXP CORP

Saint-Étienne (42000), France

Description

UXP Corp
Software for the life science industry
UXP Corp is a provider of software for the life science industry (PHARMACIM suite)

We provide traceability solutions for serialisation and aggregation and end-to-end track & trace.
These solutions cover all the functionalities needed to manage the requirements, from managing the device (N1) to communicating with the repertories (N3/N4).
UXP Corp proposes turnkey solutions including software, equipment and connection to other information systems like ERP platforms and repertory.
Our services also cover remote maintenance and hotline services, helping our clients during exploitation.

PHARMACIM suite is compliant with international regulations and follows their evolutions. It contributes to global traceability and fights against counterfeiting and parallel markets.
UXP Corp also proposes software solutions on SaaS and On-premise for digitalizing manufacturing processes (MES) This covers the digitalization of batch records, the management of batch production processes, the management of the weighing process, in-process quality controls, production performance KPI elaboration, and data analytics.

Involved for over 20 years in industrial software solutions in many markets, UXP Corp is an innovative and dynamic company, a member of the Vinci Energies Group, which is present in 56 countries worldwide.
