

As fast as it gets:

Logopak's print engine puts an end to costly downtimes.

All companies – regardless of their branch of industry – agree on one point: long set-up and downtimes mean considerable costs.

This holds true particularly when it comes to labelling, where a high throughput is usually the norm. It can be pretty frustrating when the machine is down for some time. The result: missed customer deadlines, technicians working overtime, and unhappy staff. **Logopak's print engine helps to make sure this simply doesn't happen.**

Is it time to change the print engine?

You probably know the story: Your labelling machine's print engine has been doing a great job, but now the print result is no longer as good as it used to be. So it's about time to change the print engine. However, in most cases this calls for a good deal of expertise and is very time-consuming. In other words: valuable time is lost while your labelling machine is standing still.

**Changed
in less than
1 minute!**

Logopak's print engine: In. Out. Done.

Thanks to our tried-and-tested quick-change system, the print engine can be changed in no time at all. The whole process takes under a minute and can be carried out by any one of the working staff. No "fiddly bits", and no technical know-how required. All you need to do is simply pull out the old print engine, insert the new one, and that's it – job done!

» **Reduce your set-up times to a minimum!**

Comprehensive maintenance for maximum availability!

Once you have replaced your print engine, just send us your old one for repair by post or courier. Your benefit: In the long run, you will profit from our comprehensive service approach.

- » **Unlike other suppliers, we change not only the print plate but all wear parts: including the pressure roller, the bearings and the dispensing edge.**

Just think about your car:

Who would check the pressure on only one tyre?

Our comprehensive service approach guarantees maximum availability of your system. While other manufacturers often only change the print plate when carrying out maintenance services on their print engines, Logopak checks your entire print engine from A-Z and repairs it when and where necessary: including the pressure roller, the bearings and the dispensing edge. Once completely overhauled, we will send it back to you "as good as new" – ready for the next printing job.

Your benefits at a glance:

- » **Tried-and-tested quick-change system**
- » **Easy-to-use opening and closing mechanism**
- » **Open on the side for easy handling**
- » **Permanent cleanliness thanks to regular cleaning with Logoclean**
- » **Optimal material feed thanks to brand-name labels made by Logopak**

- » **You can count on us to ensure that your print engine continuously provides reliably excellent print results.**
